

## Products

Building Systems & Services : Absorption > 16 DN

16DN015~066 cooling capacity :528kw-2321kw

### FEATURES :

- Enhanced part load design and energy efficient operation.
- Automatic multiple protection from crystallization.
- The cooling water temperature may be as low as 15°C without crystallization risk.
- Automatic regulation of solution concentration without any manual control valve.
- Carrier patented automatic injector purge system.
- ICVC control system with more advanced features.
- Direct fired chiller/heater specific burner for better unit control.
- Remote monitoring and bi-directional communication with reassuring effect.
- Applicable to all kinds of fuels, such as light oil, heavy fuel oil, city gas and natural gas.
- Guarantee of quality by Carrier advanced equipment and workmanship.
- Integrating refrigeration and heating into one unit. as for any special requirement, please contact us.
