

## Products

**Building Systems & Services :** Airside > Floor Mounted AHUs (39 G Floor Mounted AHU's)

### FEATURES :

- ➔ Standard air handling units: multistandard function combinations available for designers and customers to choose based on the actual requirements.
- ➔ Double skin panel with thermo- isolation of PU foam : 20 mm thick foam panel features light weight,good rigidity and low thermo conductivity.
- ➔ New type sealing material : Air leakage is minimized by the new type sealing material combined with specially designed aluminium alloy frame.
- ➔ Bottom drain piping : All the condensates from the water pan are drained completely through bottom drain piping.
- ➔ External coils drainage valve : the external drainage valve is equipped at the lowest point of coils for complete drainage and guarding against freezing.
- ➔ Airfoil damper : Gear driven airfoil can be opened and closed freely,and electric actuator can be implemented if necessary
- ➔ Unit fundament: each section is equipped with a fundament for strength improvement ,making transportation and assembly easier.
